

FINAL MBBS CLINICAL AND ORAL EXAMINATION FORMAT

Final examination is divided into two parts:

1	Theory	40 + 10* = 50 Marks
2	Clinical and Oral	50 Marks

*10 marks from internal assessment.

Clinical and Oral section consists of:

1. Viva		25 Marks
i.	Questions from Ear	3x2=6 Marks
ii.	Questions from Nose	3x2=6 Marks
iii.	Questions from Throat, Head and Neck	3x2=6 Marks
iv.	Paediatric & emergency	3x2=6 Marks
v.	Attitude (Logsheet)	1 Mark
2. Clinical case -1 case for each candidate		10 Marks
i.	History taking and presentation	2 Marks
ii.	Findings and interpretation	2 Marks
iii.	Diagnosis and Management	3 Marks
iv.	Skill	3 Marks
3. OSCE - 15 Stations		(1x15) = 15 Marks
i.	2 Stations=Audiology (Audiogram and Tympanogram)	2 Marks
ii.	6 Stations= Clinical Photographs+ Problem based questions (2 Clinical Methods, 1 Investigation, 1 D/D, 2 Treatment)	6 Marks
iii.	3 Stations= Instruments (1 OPD+2 OT)	3 Marks
iv.	2 Stations = 1 X-ray, 1 CTscan	2 Marks
v.	2 Stations= Operative procedures	2 Marks

(Mention indications, type, sites, view, normal landmarks, pathological findings and differential diagnosis of the findings)

List of X-rays:		List of Medications:	
i.	X-ray Mastoids Towne's View	i.	BIPP
ii.	X-ray Mastoids Lateral Oblique view	ii.	Chromic acid
iii.	X-ray Soft tissues nasopharynx lateral view	iii.	Silver Nitrate
iv.	X-ray Soft tissues neck lateral view	iv.	Oxymetazoline
v.	X-ray Soft tissues neck AP view	v.	Xylometazoline
vi.	X-ray Nasal Spine Lateral view	vi.	Xylocaine (injectable)
vii.	X-ray PNS OM view	vii.	Adrenaline
viii.	Plain CT Scan of Nose and PNS	viii.	Grommet (ventilation tube)
ix.	Plain CT Scan of Head (Brain abscess)	ix.	Gel-foam

List of Operative Procedures:

1.	Anterior nasal packing	10.	Adenoidectomy
2.	Posterior nasal packing	11.	Tracheostomy
3.	Antral wash out	12.	Cricothyroidotomy
4.	I & D of Peritonsillar abscess	13.	FB Oesophagus
	- Septal abscess	14.	FB Bronchus
	- Retropharyngeal abscess	15.	Myringotomy
	- Parapharyngeal abscess	16.	Myringoplasty
	- Mastoid abscess	17.	Mastoidectomy
	- Ludwig's angina	18.	Septoplasty
5.	Sistrunk's Operation	19.	Submucous Resection (SMR)
6.	Submandibular Salivary gland excision	20.	Nasal polyp avulsion
7.	Parotidectomy	21.	Endoscopic sinus surgery
8.	Thyroidectomy	22.	Micro-laryngoscopy (MLS) /Direct laryngoscopy and Biopsy (D.L. Biopsy)
9.	Tonsillectomy	23.	Removal of Foreign body Ear, Nose and Throat

List of Instruments:

Nose	Throat	Ear
1. Nasal speculum (OPD)	1. Laryngeal mirror (OPD)	1. Ear speculum (OPD)
2. Antral cannula (OPD)	2. Post nasal mirror (OPD)	2. Otoscope (OPD)
3. Nasal dressing forceps (OPD)	3. Tongue depressor (OPD)	3. Tuning forks (OPD)
4. Septal elevator	4. Quinsy forceps (OPD)	4. Jobson horn probe with ring curette (OPD)
5. Nasal gauze	5. Tonsil dissector with anterior pillar retractor	5. Ear syringe (OPD)
6. Nasal hammer	6. Boyle's Davis mouth gag with tongue depressor	6. Myringotomy knife
7. Luc's Forceps	7. Rigid laryngoscope	7. Self retaining haemostatic mastoid retractor
8. Fiberoptic nasopharyngolaryngoscope	8. Rigid bronchoscope	8. Periosteum elevator
9. Nasal telescopes 0°, 30°, 45°	9. Rigid oesophagoscope	9. Mastoid drill hand piece
	10. Tracheostomy tube (metal/portex)	10. Mastoid drill burrs (Diamond & Cutting)
	11. Adenoid Curette	
	12. Negus artery forceps	
	13. Suction Cannula
